Trade-marks Journal

Vol. 63 No. 3224

General Information

The *Trade-marks Journal* is published every week in compliance with Rule 15 of the *Trade-marks Regulations*. The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

Electronic *Trade-marks Journal*

The *Trade-marks Journal* is available in electronic form on the CIPO web site (http://cipo.gc.ca). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

Official Languages

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the Journal are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the Journal have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

Filing Dates

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

Nice Classification

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Trade-marks Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

GOODS

Transfer membranes for protein and nucleic acids for biotechnology and medical research use; reagent grade water; reagents for scientific and medical research use; biological and biochemical reagents to maintain human embryonic stem cells and human embryos in in-vitro culture for in-vitro scientific and research use; gene expression technology reagents, namely, ubiquitous chromatin opening elements, for scientific and research purposes; mouse embryonic stem cells and biological and biochemical reagents to maintain mouse embryonic stem cells and mouse embryos in in-vitro culture for in-vitro scientific and research use; reagents, with and without reagent carriers, for detecting analytes of biological/chemical relevance applied to diagnostics and scientific, environmental, agricultural, and biomedical research; assay kits comprising reagents, with and without reagent carriers, for detecting analytes of biological/chemical relevance applied to diagnostics and scientific, environmental, agricultural, and biomedical research; molecular based assays for use in the pharmaceutical and biopharmaceutical industries, specifically in the determination and identification of microorganisms; molecular biology products, namely, RNA purification kits composed primarily of the following reagents, streptavidin covalently coupled to surface of magnetic porous glass particles, biotinylated oligo probes, buffers and release solution for scientific and research use; RNA isolation kits composed primarily of the following reagents, guanidine thiocyanate, citrate buffer, b-mercaptoethanol, sodium acetate, phenol - chloroform - isoamyl alcohol and isopropenol for scientific and research uses; nucleic acid labeling kits composed primarily of the following reagents, buffers, alkaline phosphatase, polynucleotide kinase, marker control, and nuclease-free water for scientific and research use; cloning vectors used as packing media for chromatography and as a solid phase for biomolecule immobilization and columns, amidites and reagents for DNA and RNA synthesis and purification, nucleic acid labeling, polymerase chain reaction reagents, enzymes, hybridization reagents and electrophoresis reagents all for scientific and research use; media for performing chromatographic separations; chemicals for industrial purposes, namely, protein purifiers; reagents for use in biological processing; chromatographic packing and columns containing such packing; chemical reagents useful in liquid chromatographic analysis; bovine serum albumin for laboratory and research use; kits for the expression, amplification, purification and analysis of biological samples, said kits consisting primarily of one or more of the following; proteins, nucleic acids, cells, gels, probes, buffers, stains and associated reagents and devices for carrying out said purposes; biochemical reagents for research purposes, namely, cell culture media components, supplements, and additives; biochemicals for scientific and research use, namely, monoclonal antibodies, polyclonal antibodies, purified recombinant proteins, purified natural proteins fetal bovine serum, cell growth supplements, namely, biochemicals for affinity purification, biochemicals for western immuno blotting, biochemicals for immunocyto chemistry; biochemical preparations derived from blood serum used as growth promoters in tissue cultures and microbiological media; diagnostic preparations; namely, DNA/RNA hybridization and detection kits comprising one or more reagents, detectable labels, filters and holders for filters for scientific and research use; hybridization membranes for scientific and research use; chemical solutions containing deionized water, dextran sulfate, formamide, sodium ions, sodium dodecyl sulfate, urea, deoxyribonucleic acid, bovine serum albumin, and polyvinyl-pyrrolidone for use in solid phase nucleic acids hybridization methods of gene analysis in biomedical and biotechnical research; blood serum fraction used in in-vitro biological research for modifying surfaces of red and white blood cells; combination of blood albumen and fibrinogen used for separating tumor cells from leucocytes and erythrocytes; diagnostic reagents relating to biomedical applications for scientific and research use; scientific research test kit consisting of buffers, caspase substrate and inhibitor, and luciferase substrate for detection of protesease activity of caspase-3; kit consisting primarily of diagnostic reagents for scientific and research use, namely, for use in the quantitative detection of nucleic acids; test kits comprised a combination of anti-phosphotyosine antibodies for the detection of protein phosphorylation for scientific and research use; diagnostic test kits consisting of reagents, control slides and instructions for scientific and research use; diagnostic preparation for scientific use consisting primarily of a bioluminescent protein; biological and biochemical reagents to maintain mammalian embryonic stem cells and mammalian embryos in in-vitro culture for in-vitro scientific and research use; pharmaceutical preparations, namely, preparations for the treatment of infertility, ovulation induction, infertility and ovulation induction, autoimmune diseases, namely, immunologic deficiency syndromes, systemic lupus erythematosus, rheumatoid arthritis, non-Hodgkin's lymphoma, fibrosis, ulcerative colitis, Crohn's disease, short Bowel syndrome, arteriosclerosis, allergies, immunologic deficiency syndromes, allograft rejection, cardiovascular and circulatory diseases, growth and metabolic diseases, namely, diabetes, hypoglycemia, gout, osteoarthritis, muscular dystrophy, anemia, diseases of the central nervous system, diseases of the metabolic and endocrine systems, namely, adrenal gland disorders and thyroid disorders, respiratory diseases, cancer, gastrointestinal disease, sexual dysfunctions, viral diseases, namely, herpes, hepatitis, Acquired Immune Deficiency Syndrome (AIDS), influenza, cold, hematological disorders and calcium disorders, inflammatory disorders, namely, inflammatory bowel diseases, inflammatory connective tissue diseases; antiviral preparations for ophthalmic use; sanitary preparations for medical purposes, namely, disinfecting preparations for hands, feet, skin and body, namely, sanitizers having anti-bacterial and anti-microbial purposes; sanitary preparations for medical purposes, namely, test strips for detecting blood glucose levels; sanitary preparations for medical purposes, namely, diagnostic preparations for detecting and monitoring diabetes, hypertension, hypotension and reduced blood oxygen content; dietetic food adapted for medical use, namely, supplemental foods, namely, vitamins and minerals; dietetic food adapted for medical purposes, namely, dietetic food comprising medically useful enzymes, proteins, peptides, glycoproteins, antibodies, saccharides, cells and microorganisms in the form of tablets, drops, capsules, extract preparations, balms, liquids, syrup, effervescent tablet; dietetic foods adapted for medical use, namely, vitamins, minerals, trace elements, amino acids, cod liver oil, algae, enzymes, plant and fish oils and fats, lactic acid bacteria; dietetic food adapted for medical use for the prevention, treatment and management of hyperphosphatemia, hyperphosphatemic disorders, vascular calcification, kidney malfunction and disease, renal failure, heart disease, bone disease, and joint problems in the form of tablets, drops, capsules, extract preparations, balms, liquids, syrup, and effervescent tablet, food for babies; plasters for medical purposes, gauze for dressings; material for stopping teeth, dental wax; all purpose disinfectants; preparations for destroying vermin; fungicides, herbicides; machine parts, namely, caustic resistant cartridges for use in filtration of beer in the brewing industry; filling machines featuring pre-sterilized component bags, tubing and filling needles, for dispensing of bulk formulated liquid pharmaceutical, biopharmaceutical and diagnostic products; filters for machines, namely, sterilizing grade filter cartridges for use in the biopharmaceutical and food and beverage industries; Filters for machines, namely, tangential flow filters for preparation of biological samples for use in the pharmaceutical and biotechnology industries; parts of machines, namely, disposable filtration and purification products and assemblies, namely, bags of plastic for use in holding biological materials and related reagents with tubing of plastic to interconnect the bags and provide an entry and exit to the bags and where in one or more elements for the processing, filtration and purification of the biological materials is attached to the tubing of the bag; laboratory mixers for liquids and for liquids and solids; disposable manufacturing components and assemblies for the biopharmaceutical industry, namely, filling machines for filling bottles, vials and syringes, and single use disposable non-metal connectors for use in forming sterile connections with the filling machines ; filters for machines, namely, sterilizing grade filter cartridges for use in the pharmaceutical, biopharmaceutical and food and beverage industries; power-operated hand-held crimping tool for sealing and cutting tubing in the biopharmaceutical and food and beverage industries; sensors, namely, temperature, pH, biomass, and dissolved oxygen sensors used for sensing temperature, pH, cell density, oxygen and other gas levels; bioreactors for culturing of cells; chromatography column; laboratory filters, namely, ultrafiltration filter for water; kits comprised primarily of a device having one or more sample wells, one or more bottles of reagents and one or more bottles of wash solution for use in genomic and proteomic research; multiple well plates for use in the sample preparation and purification of DNA samples; electronic monitor for determining the total organic carbon content in water; fluorescence detection system for micro organisms comprised primarily of filters, namely, microporus membranes, fluorescent indicator panel displays, and photo-optic readers for use in the detection, enumeration and identification of microorganisms; filters for use in laboratories, namely, filters for removing contaminants from water and biological liquids, filters for laboratory and research use in the field of biopharmaceutical production, ultrafiltration filters, membrane filters for laboratory or scientific use, membranes and apparatus used in dialysis, reverse osmosis and ultrafiltration for laboratory or scientific use, ultrafiltration membranes, fluorescence, electrochemiluminescence and bioluminescence system for detecting contamination in liquids; laboratory device, namely, a closed vial and piping to dilute soluble powdered products for sterility testing; well filtration devices, namely, laboratory filters using cast-in-place filtration for filtering and purifying laboratory liquid solutions; sterility testing devices for liquids and powders comprising of one or more sealed canisters containing a membrane, vent filter and adaptors for connecting the canister and canisters to the product being tested for scientific, laboratory and industrial uses; electronic testing device, namely, an air monitor for performing microbial analysis of the air in clean rooms, kits comprised primarily of at least one or more multiple well filtration plate, at least one multiple well collection plate, one or more bottles of reagents and one or more bottles of wash solution for use in genomic research; ultrafiltration membrane for purposes of concentrating, diafiltering and purifying biomolecules in laboratory devices and process applications , ultrafiltration membranes for use with fluids in the pharmaceutical industry; scientific apparatus, namely, a laboratory testing system comprised of a filter contained within a filtration funnel and parts therefor sold as a unit for the collection, isolation and counting of micro-organisms; filtering apparatus, namely, laboratory filters and parts therefor for microbiological analyses; vacuum manifold for filtration of liquids from filter plates for laboratory and research use; laboratory filters, namely, bottle caps for use in sterilizing filtration in laboratories; filter units for laboratory use for removing contaminants from water and other liquids; filters for use with ultra high pressure liquid chromatography systems; scientific apparatus, namely, a laboratory testing system comprised of a filter contained within filtration funnel and parts therefore sold as a unit for the collection, isolation and counting of micro-organisms; filtering apparatus, namely, laboratory filters and parts therefor for microbiological analyses; apparatus and equipment comprising filters and holders for filters for testing the sterility of liquid preparations by filtration and incubation; bioluminescence monitors for detecting contamination in liquids in the pharmaceutical, biopharmaceutical, cosmetic and beverage industries; laboratory filters for removal of viruses from solutions; separators for performing chromatographic separations and parts thereof for industrial and laboratory use; purification cartridge comprised of ion exchange resin, for laboratory use in removing contaminants from water; adsorptive separation devices, namely, laboratory pipettes and parts thereof; multiple well membrane filter for laboratory and research use; regenerated cellulose ultrafiltration membranes for laboratory use; process chromatography systems comprised of valves, columns, slurry tanks, liquid tanks and slurry transfer skids, and components thereof; pilot and process chromatography apparatus, namely, pilot and production chromatography columns; filtration membranes for laboratory use; cartridges for laboratory use in removing contaminants from water; filtering units for clinical laboratory use, for removing contaminants from water; ultrafiltration membranes for use in fluid processing for producing drugs; laboratory filters for filtering and purifying laboratory liquid solutions such as tissue culture media; computer software for management of biopharmaceutical purification processes; laboratory and process scale membrane filtration systems comprising pumps, electronic controls, filters, piping, valves and cartridges; filter holder containing a membrane laboratory filter for pharmaceutical, life science and health care use, sold as a unit; test units for determining the integrity and pore-size distribution of membrane filters; laboratory sample concentrator unit; disposable centrifugal filters for use in medical and research laboratories; laboratory equipment, namely, tissue arrayers; disposable filters and micro concentrators for use in research and medical laboratories, forensic science, life science; disposable filtration devices, namely, filters and plastic housing for purification of fluid biological and chemical samples, for use in research and clinical laboratories; magnetic controlled pore glass; chromatography apparatus, namely, liquid chromatography columns, for performing chromatographic separations and parts thereof for industrial and laboratory use and parts and fittings thereof; sterilizing laboratory filter holders primarily for use in the analysis of particulate and biological contamination; laboratory equipment, namely, filtration devices for in vitro diagnostic applications; inserts for culture plates for laboratory use; liquid filtering and solute concentrating unit for laboratory use; electro-elution apparatus, namely, dissolvers for the eluting of molecules from sections of electrophoresis gel; equipment for use in cell culture, namely, membranes and membrane cartridges for laboratory and industrial use; fluid separators for laboratory separations and analyses; microprocessor-based pressure control units, namely, pressure sensors; liquid filtering and solute concentrating unit for laboratory and industrial, use; laboratory filters for in-vitro separation of proteins from body fluids; clinical and laboratory sample concentrator unit; ultrafiltration membranes, ultrafiltration units, namely, tangential flow filtration units and membranes for such units and parts thereof; electronic and electrical testing apparatus for laboratory contaminants and clinical analysis, namely, electrophoresis separators; incubators for microbiological samples on filters; ultraviolet sterilizers for filter holder between filtrations and for water supplies; separators for fluids in successively smaller size filters; sterilizing filters; and stainless steel filter holders for liquid filters, ultra filtration water filter used to remove RNAse, DNAse, endocrine disruptor molecules and pyrogens from water for use by scientists in laboratories to prevent any interference in experiments using such water; ultrafiltration membranes used for filtering salts and biomolecules in the laboratory, not including nursing equipment or and parts thereof used in the feeding of infants; magnetic media and glass media, namely silica gel and controlled pore glass used as packing media for chromatography and as a solid phase for biomolecule immobilization and columns; tangential flow fluid filtration system comprised of a tangential flow filtration membrane cassette holder, scale, feed pump and piping and valves therefor, for purification of biopharmaceuticals; purification units for laboratory use, for removing contaminants from water and other liquids; water purification system comprising one or more filters and ion-exchange media and uv light with a control system and one or more pumps for analytical grade water; point of use purified water dispenser; liquid filters for use in the pharmaceutical, food and beverage industries; hydrophobic vent membrane for industrial use in venting filter devices; filters for sterilizing air and gas streams; filters and membrane absorbers for filtering and removing trace contaminants from water and biological fluids in the manufacturing setting for the biopharmaceutical industry; water purifiers for clinical analyzers; graded density depth filter used in pharmaceutical, biopharmaceutical, cosmetics and water clarification industries; polypropylene depth filter for use in removing particles and microorganisms from liquids and gases; liquid filtration unit and filtration membrane for virus removal from solutions for industrial use; filter cartridge for the removal of particulates, bacteria, colloids and microorganisms from gases and liquids for industrial, laboratory and medical use; water purification units and parts therefor; filter cartridge for the removal of particulates, bacteria, colloids and microorganisms from gases and liquids for industrial, laboratory and medical use; pilot scale tangential flow filtration system for pharmaceutical and biotech use comprising of housing, pump, filters, tank, valves, sensors, computer hardware, for clarification and ultrafiltration of fluids; filtering units for in-process testing for filtering microbiological liquids; ultrafiltration membrane filter cartridges for use with fluids in the pharmaceutical industry; sterilizing grade filter cartridges for use in biopharmaceutical applications; filter units for use in life science and pharmaceutical applications, namely, membrane filter cartridges for the separation of biomolecules in the biopharmaceutical production; purification units for removing contaminants from water and other liquids; liquid treatment equipment, namely, sterilizing grade filter cartridge unit for use in the pharmaceutical, biopharmaceutical, and food and beverage industries; sterilizing filtration units for non-medical use, namely, bottle caps for use with sterilizing filtration units in laboratories; filters for use in solvents and solvent based fluids in the pharmaceutical and chemical industries; point of use purified water dispenser; water purification units containing ion exchange resins; water purification units for laboratory use; membranous filtering units for pharmaceuticals, beverage, food, and biopharmaceutical products; fluorocarbon polymer filters for filtration of liquid process chemicals, for industrial use; membrane filters made from porous sheet material and free of particles for purifying process liquids used in the manufacture of pharmaceutical, biopharmaceutical, and food and beverage products; filter units for use in life science and pharmaceutical, applications, namely, membrane filters for the separation of biomolecules in the laboratory; filter elements and holders therefor, for use in fluid processing; membrane filters for fluid processing; purifiers for the purification of water and other liquids by reverse osmosis comprising filters and holders therefor; purifiers for the purification of water comprising a filter element and a holder therefor; membranes and filters used in diafiltration, reverse osmosis and ultrafiltration -, and parts thereof; water conditioners; water conditioning units; paper, cardboard and goods made from these materials, namely, cardboard, cardboard boxes and containers, writing paper, bond paper, craft paper, copy paper, brochures about chemicals, photovoltaics and pharmaceuticals, books in the field of photovoltaics, chemical and pharmaceutical processes; printed matter, namely, newsletters, magazines and information sheets in the field of chemicals and photovoltaics; printed instructional and teaching material, namely books, brochures, manuals, medical publications in the field of photovoltaics and chemical processes; plastic materials for packaging, namely, plastic bags for packaging, plastic bags for merchandise packaging, and plastic bubble packs; office machines, namely, paper folding machines for office use, and office perforating machines

SERVICES

Custom production of cell cultures and biological products, namely, antibodies and proteins and related reagents; custom antibody production; custom production of cell cultures and biological products, namely, antibodies and proteins and related reagents; analytical testing services, namely, evaluation testing for pharmaceutical, biopharmaceutical and chemical products, featuring testing for safety, toxicity, content, identity, purity, configuration and function, using chemical, in-vitro and in-vivo assays, analyses and models for the pharmaceutical biopharmaceutical industries; analytical services, namely, in-vivo cellular assays for the research and screening of molecules and biological samples; pharmaceutical research and testing services, namely, application, filtration and validation of microbiological and physicochemical systems; pharmaceutical and biological research services, namely, antisera studies, immunogen preparation, immunization and production, antibody characterization, antibody purification, antibody packaging, hybridoma development and selection, preparation of custom tissue cultures, immunoassay development and testing, immunogenicity testing, and vivarium services, namely, pharmacological, safety and toxicity research, in-vivo modeling, antibody generation and cell line development

GOODS

Computer hardware and software for processing, authorizing, and transferring data between point of sale devices and contactless smart cards; computer hardware and software for configuring and processing smart cards; transport ticketing computer hardware and software; computer software and hardware for the sale and purchase of tickets; electronic fare collection equipment sold as a unit, namely, smart cards and magnetic encoded cards containing programming for use with electronic fare collection, fare boxes, ticket machines, magnetic card processors, smart card readers, ticket processors, turnstiles, electronic control processors; software for financial analysis and accounting in the field of consumer spending; automated parking systems, namely, computer software to run parking fee collection devices and computer hardware, fare boxes, ticket machines, magnetic card processors, smart card readers, ticket processors, electronic control processors, smart cards and magnetic encoded cards containing programming for use with automated parking; personnel locator computer hardware and software; combat simulators for training purposes; training systems for aircraft, vehicles, weapons and personnel in live, constructive and virtual environments consisting of transceivers, lasers not for medical use, GPS technology in the nature of a global positioning system, data link technology in the nature of electronic and optical communications instruments and components, namely, optical data links, electronic encryption units, radio frequency identification tag readers, wireless communication transponders and radio receivers; computer hardware, electronic display interfaces; computer software for tracking people and vehicles, collecting, recording and replaying instrumentation data, providing automated processing and analysis of instrumentation data, computer networking, monitoring hit/miss notifications, scoring the outcome of weapons engagements and simulations of kinetic and non-kinetic threat weapons systems; electronic apparatus for tracking people and vehicles, collecting, recording and replaying instrumentation data, providing automated processing and analysis of instrumentation data, networking, monitoring hit/miss notifications, scoring the outcome of weapons engagements and simulations of kinetic and non-kinetic threat weapons systems, namely, circuit boards, keyboards, monitors, and antennas; computer peripheral equipment, namely, keyboards, mouse, monitor and cables for tracking people and vehicles, collecting, recording and replaying instrumentation data, providing automated processing and analysis of instrumentation data, computer networking, monitoring hit/miss notifications, scoring the outcome of weapons engagements and simulations of kinetic and non-kinetic threat weapons systems, all of the foregoing for education, training development, management support, and operations and maintenance support; communication and electronic products, namely, radio and optical data links consisting of compact modem assemblies, RF amplifiers and antennas for radio datalinks and modulated low-power lasers and optical receivers for optical datalinks for transferring radar, video and other information obtained via sensors for intelligence, surveillance, search-and-rescue, air traffic control and military/civil communication markets; radios; radio, electronic optical and mobile data transmitters; radio receivers, filters, and exciters; high power amplifiers, antennas, direction-finding transponders and radio receivers, computers, computer display screens and monitors and software to transmit, network, detect, intercept, analyze, distribute and process intelligence and communications signals; computer hardware and software for surveillance associated with military intelligence gathering and relaying adversary information; electronic communications computer hardware and software for military intelligence gathering and relaying adversary information, transponders and radio receivers; computer hardware and software, transponders and radio receivers for use with shelters and unmanned aerial vehicles; computer hardware and software for the delivery of air-to-air, air-to-ground, air-to-water, ground-to-ground and ground-to-water missiles; computer hardware and software for the simulation of, and real time dissemination and display of the delivery of surveillance apparatus and explosives; automatic fare collection systems for rail, bus and parking lots sold as a unit, consisting of encoded smart cards containing programming for fare collection, magnetic encoded cards containing programming for fair collection, card production machines used to produce the foregoing encoded smart cards and magnetic encoded cards, pay stations, ticket issuing and validating machines, electronic processors of smart cards and tickets and payments, electronic point of sale devices, smart card readers, fare boxes, entry/exit terminals, entry/exit gates, and wireless communication transponders and radio receivers; computer hardware and software for transit and parking financial analysis and accounting, motion sensors, anti-intrusion alarms and fire alarms, cameras, audio and video recorders, and explosives detectors for security.

SERVICES

Consulting services with regard to the installation and maintenance of electronic fare collection systems; consulting related to the installation and maintenance of computer hardware related to smart cards and computer hardware related to the sale and purchase of tickets; computer hardware technical support services for the installation and maintenance of combat simulation training systems, weapons effects analysis systems, and weapons simulation systems; computer hardware technical support services for the maintenance of automatic fare collection systems for rail, bus, and parking lots; consulting related to the installation and maintenance of computer hardware systems for processing, authorizing and transferring data between point of sale devices and contactless smart cards; Consulting services in the field of automated parking systems and public transportation; Educational services, namely, training related to the development and implementation of simulated combat training and consequence management exercises, namely, exercises related to responding to life threatening or destructive events; educational services, namely, training related to allied force modernization for combat, security and peacekeeping missions; educational services, namely, providing classes, seminars and workshops in the field of military combat, security and peacekeeping missions; Military technical research and development for others in the field of technical warfare communications; engineering and design services in the fields of automatic revenue collection systems, surveying and electronic measuring equipment, communications systems, flight collision warning systems, and electronic tracking systems for others; consulting related to the design, development, engineering, operation and maintenance of software for computer systems for processing, authorizing and transferring data between point of sale devices and contactless smart cards, software related to smart cards, transport ticketing computer systems and software related to the sale and purchase of tickets; custom software design for others; engineering and software technical support services for the design, development, installation, and maintenance of computer software for combat simulation training systems, weapons effects analysis systems, and weapons simulation systems; engineering and software technical support services for the design, development and maintenance of computer software for automatic fare collection systems for rail, bus, and parking lots; consulting services with regard to the design and development of electronic fare collection systems; consultation and advice related to allied force modernization for combat, security and peacekeeping missions, namely, consultation and advice regarding the design and development of modern vehicles and computer systems for combat, security and peacekeeping missions; consulting related to the design, development, engineering and operation of computer hardware related to smart cards and computer hardware related to the sale and purchase of tickets; computer hardware technical support services for the design, development, and operation of combat simulation training systems, weapons effects analysis systems, and weapons simulation systems; computer hardware technical support services for the design, development, and operation of automatic fare collection systems for rail, bus, and parking lots; and Security consultation and security advice related to the development and implementation of simulated combat training and consequence management exercises, namely, exercises related to responding to life threatening or destructive events; security consultation and security advice related to allied force modernization for combat, security and peacekeeping missions.
